Tech Lead — Dutch Digital Collectibles (self employed)	Jul 2021 – Jun 2025
Full Stack Software Engineer — Kryha	Jul 2022 – Jul 2024
Sales — Amac	Jun 2019 – Present
Internship — NXP Semiconductors	Jan 2020 – Jun 2020
Junior Broadcast Engineer — Mediachoice	Sep 2015 – Sep 2016

FREELANCE PROJECTS

Block Explorer for the Aztec Network

My responsibilities for this project were setting up and maintaining the infrastructure: a Kubernetes cluster with multiple microservices communicating over a Kafka message bus. The frontend was also one of my responsibilities.

GitHub: github.com/aztec-scan/chicmoz

Migration from AWS Lambda to a Managed Kubernetes Cluster

When I started with this project the digital infrastructure was an unorganized set of unmanaged AWS Lambda functions. I introduced development, staging and production environments, created a standard development cycle for all developers to follow, set up a CD pipeline with ArgoCD as the continuous delivery tool, and extracted functionality from large services to create a clear separation of concern.

Private client — no public repository available.

EDUCATION

HBO-ICT Software Engineering — Fontys, Eindhoven	2018 – 2022
Mediatechnologie — Grafisch Lyceum, Rotterdam	2013 – 2016
Pre-vocational secondary education — Lyceum Ypenburg, Den Haag	2009 – 2013

Certificates

- 2015 — MTA: Windows Server Administration Fundamentals
- 2015 — MTA: Network Fundamentals
- 2016 — LPI: Linux Essentials

SIDE ACTIVITIES
