

Mauro Eijsenring

DevOps & Full-Stack Engineer — Den Haag, Netherlands

PERSONAL DETAILS

Name	Mauro Eijsenring
Location	Den Haag, Netherlands
Email	mauro@eijsenring.com
LinkedIn	linkedin.com/in/mauro-eijsenring
Nationality	Dutch

WORK EXPERIENCE

Freelancing — Self employed	Jul 2024 – Present
Tech Lead — Dutch Digital Collectibles (self employed)	Jul 2021 – Jun 2025
Full Stack Software Engineer — Kryha	Jul 2022 – Jul 2024
Sales — Amac	Jun 2019 – Jul 2022
Internship — NXP Semiconductors	Jan 2020 – Jun 2020
Junior Broadcast Engineer — Mediachoice	Sep 2015 – Sep 2016

FREELANCE PROJECTS

Block Explorer for the Aztec Network

Set up and maintained the production Kubernetes cluster with microservices talking over a Kafka message bus. Built and maintained several of the services end-to-end — including the **ethereum-listener** / **aztec-listener** indexer pipelines that keep our data in sync with L1 and L2 — plus the frontend, and per-service CI/CD across three live networks.

GitHub: github.com/aztec-scan/chicmoz

Liquid Staking Protocol — Olla Finance

Built a liquid staking protocol for the Aztec Network with a 3-developer team. I owned the frontend and the Go backend services behind it, including the data pipelines powering the staking data users see. For the infrastructure I designed the block explorer's Kubernetes platform to run multiple applications on the same hardware — Olla became another workload on that platform instead of a whole new stack, saving infrastructure cost and setup time.

GitHub: github.com/ollafinance/olla-ui

Migration from AWS Lambda to a Managed Kubernetes Cluster

Replaced an unorganized stack of unmanaged AWS Lambda functions with a managed Kubernetes platform — without downtime of the live production environment. Introduced development, staging and production environments, a standard development cycle, and an ArgoCD CD pipeline. Extracted functionality from large services into clear, separated units. Production stayed live on the old stack until the new platform was proven in staging, then cut over.

Private client — no public repository available.

EDUCATION

HBO-ICT Software Engineering — Fontys, Eindhoven	2018 – 2022
Mediatechnologie — Grafisch Lyceum, Rotterdam	2013 – 2016
Pre-vocational secondary education — Lyceum Ypenburg, Den Haag	2009 – 2013

Certificates

- 2015 — MTA: Windows Server Administration Fundamentals
- 2015 — MTA: Network Fundamentals
- 2016 — LPI: Linux Essentials

SIDE ACTIVITIES

- **2024 – present** — Self-hosting applications for friends and family (Immich, Vaultwarden, Nextcloud, personal websites & portfolios)
- **2020 – present** — Attending hackathons
- **2018 – 2019** — Tournament committee, Handbal Oktopus
- **2013** — Coach/trainer, Junior team handball

SKILLS & COMPETENCES

Advanced: Linux, macOS, TypeScript, JavaScript, React, CSS, Tailwind, PostgreSQL, MongoDB, Kubernetes, Docker, Lua, Neovim, Self-hosting

Programming languages: Java, Kotlin, Swift, C#, Go, Rust

Soft skills: Public speaking, good social contacts
